**NATION'S FASTEST-GROWING ACCOUNTING FIRM REDUCES STORAGE 67%
WITH MIMOSA SYSTEMS EMAIL ARCHIVING AND RECOVERY SOLUTION**

The Siegfried Group LLP Deploys Mimosa NearPoint for Microsoft Exchange Server to Improve Overall Performance, Reduce Backup and Recovery Times for Corporate-Wide Email System

Santa Clara, Calif. – February 6, 2007 – Mimosa Systems™, a leader in unified information management solutions for enterprise content, today announced that the nation's fastest-growing accounting firm, The Siegfried Group LLP, has achieved a 67 percent savings in storage requirements for its email communications system by implementing the Mimosa NearPoint™ for Microsoft® Exchange Server to archive and recover data stored on its corporate email servers.

In addition to storage reduction, The Siegfried Group has utilized NearPoint's intelligent mailbox storage management features to dramatically improve email performance, while reducing mailbox recovery times.

Established in 1988, The Siegfried Group today is the nation's only CPA firm that provides major public companies and other large organizations with high-caliber accounting and finance professionals to address surges in critical projects. *Inside Public Accounting* ranked the company 24th on its 2006 100 Largest Accounting Firms index. With a 95 percent growth rate, the firm was the fastest-growing CPA firm among the top 50 and is a three consecutive year IPA growth All-Star. The Siegfried Group was also recognized as the third largest firm in the Atlantic/Southeast.

Frank McGurk, IT Coordinator at The Siegfried Group stated, "Following our Mimosa NearPoint deployment, we received numerous positive comments from our employees about the performance of our email system."

Microsoft Outlook is an important communication tool for The Siegfried Group. With offices in 27 cities across the US, the majority of the company's employees are either remote or mobile. After growing rapidly in just three years, The Siegfried Group's email data had grown to approximately 250GB. As a result of the NearPoint deployment, email storage has been reduced to 80 GB. Because of NearPoint's unique continuous data protection architecture, The Siegfried Group's email backup process has been reduced to a weekly activity that is completed in approximately two hours.

McGurk noted that The Siegfried Group chose Mimosa NearPoint because it offered the following key benefits:

- **Automated exchange storage management:** NearPoint significantly reduced The Siegfried Group's overall storage requirements by extending attachments, based on policies of age and size, to the NearPoint server while maintaining seamless access to email data for end users.
- **Agent-less architecture:** NearPoint does not require agents on either the Exchange Server or user desktops which sped The Siegfried Group's deployment and ensures that there is no impact to their Exchange Server performance.
