

WHY THE REPORTING PAK?

Now you can compare and report on Group Policy Settings quickly and easily!

Comparing GPO settings is a tedious, manual process—until GPO Compare. With the newest version of GPO Compare—now part of the GPO Reporting Pak, you can more quickly and easily compare GPO settings in the latest versions of Windows! And, with the new GPO Exporter, reporting, sorting and searching on Group Policy settings has never been easier!

GPEXPERT® GPO Reporting Pak provides two powerful tools for comparing and exporting GPO settings. Whether its comparing live GPOs to GPO backups, or exporting all of your GPO settings to Excel, the Reporting Pak has you covered!

PRODUCT REQUIREMENTS

Operating Systems Supported for Installation:

Microsoft® Windows® 7, Windows Server 2008-R2, Microsoft Windows Vista

Memory:

Minimum 20MB free RAM

Hard Disk:

Minimum 20MB free disk space

Additional Requirements:

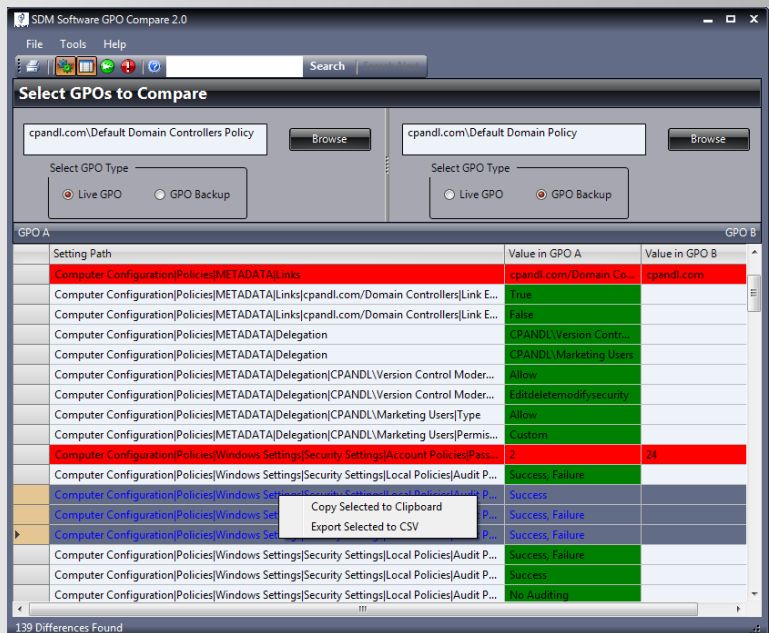

Microsoft .NET Framework 3.5,
Microsoft PowerShell 2.0

BENEFITS

- Provides the **GPO Compare** and **GPO Exporter** tools to let you compare and report on Group Policy settings
- GPO Compare lets you compare live GPOs or GPO backups—quickly finding setting differences
- GPO Exporter lets you selectively export GPO settings from one or more GPO to a variety of formats, including CSV, Excel and PDF
- Powerful keyword search to easily find settings and sorting to easily find redundant settings
- Both products provide **PowerShell** interfaces for automated comparison and reporting!

FEATURES

- Support for the latest policy settings from Windows 7 and Windows Server 2008-R2
- Group Policy comparison quickly identifies inconsistencies
- Group Policy export lets you choose which settings to export and lets you search and sort for specific settings
- Both products support command-line interfaces with PowerShell
- GPO Exporter lets you output to a format that can be used with our Group Policy Automation Engine to speed GPO migrations!
